

Save time – save life

# S-CUT<sup>®</sup> XC-E

Manufactured  
in Sweden by  
ES Equipment AB

## Self-evident safety for you and your horse

**Horses that become** entangled often injure themselves badly when they panic and try to get loose. With an **S-CUT XC-E** handy in the stable or the horsebox, you can free a horse that has started to panic in one simple operation.

### The S-CUT XC-E easily cuts through

- Halter straps.
- Halters, in both leather and nylon.
- Electric fence wire/electric fence strap in electric power off conditions.
- Saddle girths and horse blankets etc.

**Many accidents** where horses injure themselves happen in the field. With an **S-CUT XC-E** available, you can prevent your horse from tearing its tendons and ligaments when it tries to get free.

**The S-CUT XC-E is a Swedish** invention suited to tough conditions. The product is suitable for both right and left-handed people, it is quick and safe and can be used easily, even while wearing thick gloves.

The blade does not rotate while cutting. When the cutting area becomes blunt, a new cutting area is rotated forwards by loosening the screw.

### About the S-CUT XC-E

**Weight:** 0.105 kg.

**Length:** 210 mm.

**Material:** Powder coated aluminium and plastic. Cutting blade may corrode in wet conditions, must be kept dry. The blade is coated with a thin layer of oil at delivery.
